

Take control with nowSecure Defend.

Digital security is more important than ever. Compliance demands keep rising. Yet complete visibility has never been harder to achieve.

Building and maintaining your own Security Operations Centre to protect you is often prohibitively costly and overly complex.

nowSecure Defend is a Security Operations Centre (SOC) manned by a team of UK based elite, security experts and underpinned by a centralised, modular system that vastly enhances your protection, detection, and response capabilities.

nowSecure Defend extends your security resources to reduce both your cybersecurity risks and cost base.

→ nowSecure Defend for early warnings on the issues that could indicate the beginning of an attack:

nowSecure Defend offers comprehensive management, alerting, triage, investigation and remediation services:

Comprehensive Managed Security

Centralised bird's eye view

Extensible, modular approach

24/7 real-time monitoring

Eliminate security overlaps

Bridge network and cloud

- ✓ **Visibility** – Better and faster troubleshooting with the intelligence needed to proactively detect and mitigate issues.
- ✓ **Alerting** – Contain any threats before they cause serious problems with information and context allowing you to protect your business.
- ✓ **Investigation** – Gain insights into the root cause of the incidents and protect your organisation against future attacks.
- ✓ **Remediation** – Contain security risks, prevent financial losses to your organisation and address cybersecurity risks in real-time.

nowSecure Defend protects your people, network and infrastructure with best of breed security services and technology.

Cisco Secure Endpoints

Securely connect users, stop malicious software with next generation antivirus and behavioural protection. Investigate and remediate security incidents as well as automated isolation to provide rapid containment of attacks.

Security tuning and refinement from your dedicated security team

As a cloud delivered platform, our service focuses on ensuring our customers get the very best out of their endpoint security. Safe in the knowledge they are in expert hands who can optimise the features and settings to best fit the environment. This means staying on top of all the threats, the new, emerging vectors and tuning the platform to take full advantage of the new features and techniques available to enhance protection.

Alien Vault

Management (USM) offers threat detection, incident response and compliance in a single platform. USM centralises security monitoring of networks and devices in the cloud, on premises, and in remote locations, helping you to detect threats virtually anywhere.

Cisco Umbrella

Cisco Umbrella integrates multiple components that were once standalone security services and appliances in a single, cloud-native solution.

SecureX

SecureX is a cloud-native, built-in platform experience that connects Cisco Secure portfolio and your infrastructure. It is integrated and open for simplicity, unified in one location for visibility, and maximises operational efficiency with automated workflows. Radically reduce threat dwell time and human-powered tasks to stay compliant and counter attacks.

Try nowSecure Defend for 30 days. Fully managed trial. No obligation. →
