

Understand your security strengths and weaknesses, uncover where you are at risk and **see the path forward.**

NIST assessments are considered a gold standard for security evaluation — evaluating and documenting the inherent risk your people and organisation face.

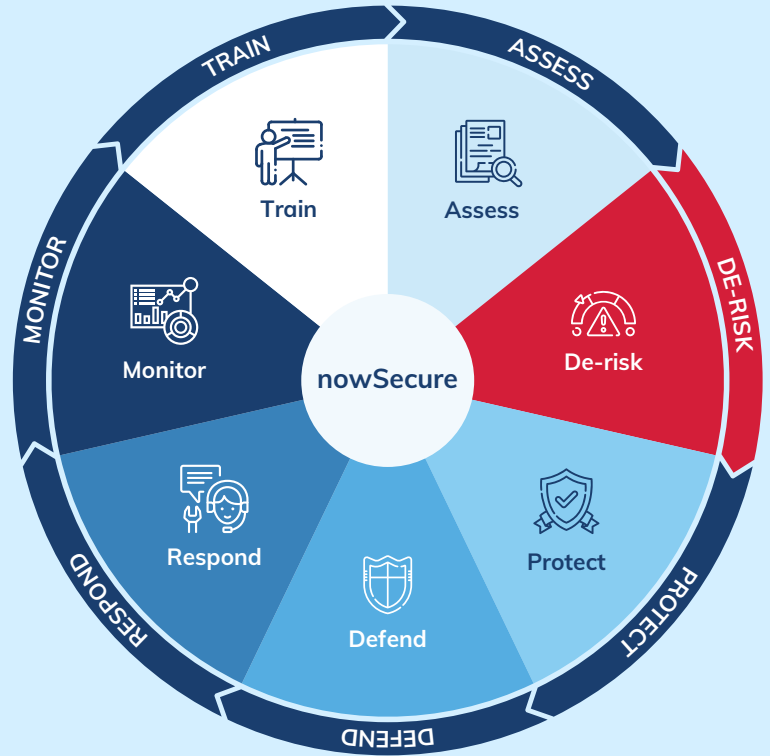

A nowSecure De-risk evaluation will identify your organisation's risks and how you score against the NIST best practice framework, and provide recommendations to improve your security posture, as well as how to prevent, detect and respond to cyber-attacks.

Implementing the NIST Cybersecurity Framework can help your organisation become more focused on protecting its critical assets.

Understand the key risks and their impacts in just a few hours with our cyber-security experts.

nowSecure De-risk helps you risk assess your current security status quo to ascertain how well you can identify, protect, detect and respond to a cyber-attack, if it should happen. This analysis clearly illustrates any vulnerabilities your company could potentially face. Knowing the key risks to your business means that you can channel investment and time into the right places in your business. It also allows you to mitigate cyber risks and prevent attacks that can impact your revenue and reputation.

Receive a comprehensive face to face assessment with a cyber-security expert, based on industry best practice (NIST CSF).

Limit or contain the impact of a potential cybersecurity event with appropriate safeguards to ensure delivery of critical infrastructure services.

Understand the business context, the resources that support critical functions, and the related cybersecurity risks.

Detailed report highlighting findings and key action points.

Develop a robust risk management strategy consistent with your business needs.

Focus and prioritise your efforts.
