

Develop a comprehensive and actionable **cyber incident plan.**

Forewarned is forearmed.

Every company is vulnerable. With an attack every 11 seconds globally, your organisation is likely to fall victim of cyber criminals at some point.

However, you can take action right now by preparing for this eventuality.

It is in your company's best interests to have a well thought out cyber incident plan.

nowSecure Plan can assist you in developing a comprehensive and actionable cyber incident plan that will help you quickly restore operations, minimise losses, fix vulnerabilities and thoroughly strengthen security to avoid future incidents.

Develop Cyber Incident Plan in 5 steps:

STEP 1.

Understand

Review of existing documentation, approach technologies and expertise.

STEP 2.

Adapt

Adapting development of your plan to suit your unique requirements.

STEP 3.

Develop

Development of a comprehensive and actionable cyber incident plan.

STEP 4.

Review

Review and adjustment of the draft plan before it's published.

STEP 5.

Test

We recommend you schedule a test of your plan at least once annually.
