

Secure, high-speed networks with **nowConnect LAN.**

Reliable and versatile network designed to be resilient, intelligent and secure.

The expertise, performance, security, and stability required to drive the connected organisation.

Users depend on the network to access the most important information that they need to do their jobs. Therefore the network must not only be reliable but also needs to incorporate versatility in order to address the changing needs of an organisation.

At Nowcomm, we adopt a three-tier network topology approach, using core, distribution, and access layers. This approach provides a foundation for the network enabling you to take advantage of next generation services such as SD-Access, Secure Network Analytics, Policy-Based Access and Segmentation.

For greater levels of network visibility and control

nowConnect LAN offers Cisco Catalyst range of network switches that can be implemented in a non-fabric and SD-Access fabric model, controlled by Cisco DNA Center.

- ✓ **Provisioning, Control and Assurance** provided to all fabric enabled devices
- ✓ **Segmentation, automation and analytics** for greater levels of visibility and control on the network.

For organisations with cloud first strategy

nowConnect LAN also offers Meraki MS range of switches fully managed by the Meraki cloud dashboard.

- ✓ **Centralised dashboard** for multi-site management
- ✓ **Deep network data and analysis** for better network management and smarter working
- ✓ **Effortless scalability** to grow the network alongside your organisation.

Nowcomm will work with your team to ensure that the best solution, design and implementation method is chosen.

Security

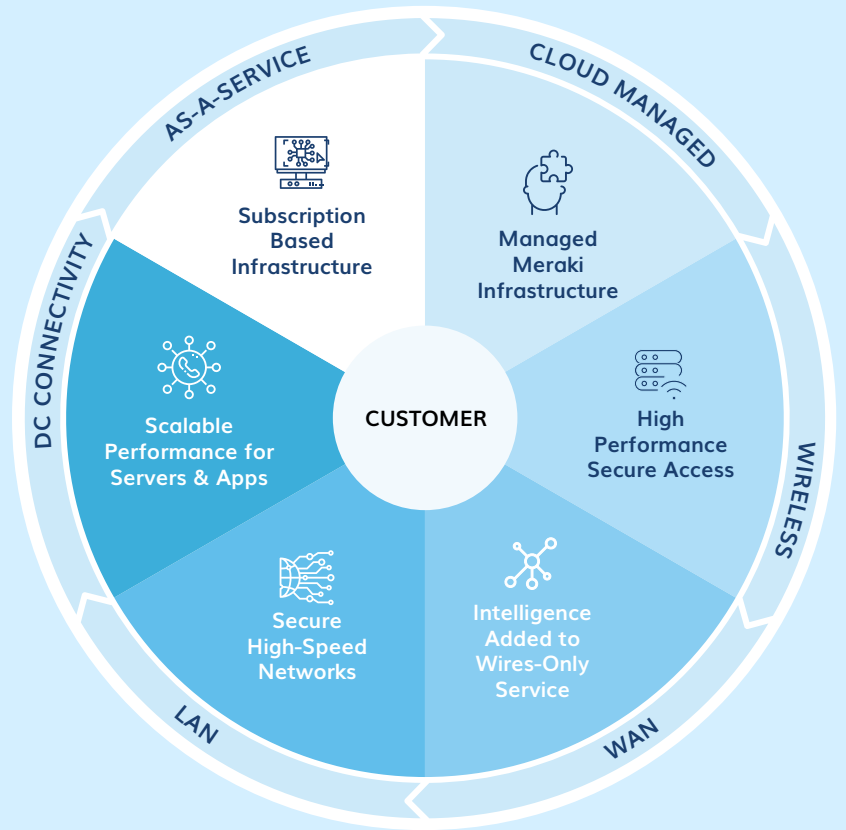

Create a secure network environment with Cisco Secure products integrations. Nowcomm adopt a zero-trust strategy when designing networks, this ensures that only valid end-users have access to the resources they need to consume.

Insights

Both offerings provide enhanced reporting functionality that can highlight statistics, policy and compliance issues; performance analysis as well as providing live data feeds to help troubleshoot and remediate issues.

Deployment

nowConnect LAN offers a variety of solutions to suit your needs, including both on premise and cloud managed solutions. This flexibility is intended to match business strategy requirements as well as providing network administrators with a single point of management.

Nowcomm offer two management models for the operation of a Local Area Network solution in production. These are:

- ✓ **Fully Managed** - a complete managed end to end solution requiring no in-house skills to from your organisation.
- ✓ **Co-Managed** - for customers who would prefer to be more hands on with the day to day running of the network and any changes required, with Nowcomm professional services available.

→ nowcomm's approach

Customer experience is at the heart of our strategy and our focus is fixed firmly on helping you every step of the way and delivering solution that is best suited to your unique requirements.

- A full analysis of LAN requirements
- Cisco's validated designs
- Review and test before delivery
- Health Monitoring and Management Fund
- Configuration advice and guidance
- Flexibility and licence management
